Contents

Chapter I—Metabolism

Regulation of the Intestinal Insulin-Like Growth Factor-I (IGF-I) Action Pathway After Massive Small Bowel Resection and IGF-I Administration 1
Mark P. Mantell, MD, Thomas R. Ziegler, MD, Robert J. Smith, MD, and John L. Rombeau, MD, FACS

Polyamine Synthesis in Liver Increases During Sepsis and Following Administration of Tumor Necrosis Factor or Interleukin-1 4
Gregory Tiao, MD, Yoshifumi Noguchi, MD, J. Howard James, PhD, Per-Olof Hasselgren, MD, FACS, and Josef Fischer, MD, FACS

CycloOxygenase Blockade Abrogates Hepatic Arginine Uptake in Endotoxemic Rats 7
Yoshifumi Inoue, MD, and Wiley W. Souba, MD, ScD, FACS

Lipopolysaccharide and Cytokines Induce Arginine Biosynthetic Activity in Rat Pulmonary Artery Smooth Muscle Cells (RPASM) 11
Don K. Nakayama, MD, FACS, Sidney M. Morris, PhD, Stephen Morrow, MD, Paul Davies, PhD, Bruce R. Pitt, PhD, Richard L. Simmons, MD, FACS, and Timothy R. Billiar, MD

Glutamine-Enriched Total Parenteral Nutrition Increases Macrophage Antimicrobial Function 14
Jian Shou, MD, Jacqueline Lappin, FRCSI, Emery Minnard, MD, and John M. Daly, MD, FACS

N-Acetylcysteine Differentially Modulates Macrophage Activation by Lipopolysaccharide 16
Guy F. Brisseau, MD, John C. Marshall, MD, FRCSC, FACS, Paul Y.C. Cheung, MSc, and Ori D. Rotstein, MD, FRCSC, FACS

Effects of Feeding ω-3 Polyunsaturated Fatty Acids on Cell Membrane Phospholipid Fatty Acid Composition of Macrophages, the Production of Tumor Necrosis Factor-α, and Secretion of Eicosanoids in Mice 18
Sambasiva R. Chavali, PhD, W. William Zhong, MD, MS, and R. Armour Forse, MD, PhD

The Parasympathetic (PSNS) and Sympathetic (SNS) Nervous Systems Mediate the Systemic Effects of Short Chain Fatty Acids (SCFA) on Jejunal Structure and Function 20
Kathleen Reilly, MD, Wendy Frankel, MD, David Klurfeld, PhD, David Choi, BA, and John L. Rombeau, MD, FACS

Hyperinsulinemia Inhibits Proteolysis but Not Lipolysis Under Stress 23
Mohammed Sika, PhD, Kareem Jabbour, BS, Phillip Williams, BS, Paul Flakoll, PhD, and Naji Abumrad, MD

β_1 Blockade Decreases Cardiac Work Without Affecting Protein Breakdown or Lipolysis in Severely Burned Patients 25
Sergio P. Maggi, MD, Gianni Biolo, MD, Michael S. Muller, MBBS, Robert E. Barrow, PhD, Robert R. Wolfe, PhD, and David N. Herndon, MD

The Use of Morphine Analgesia Is Associated with Enhanced Catabolism via the Central Nervous System 27
Alexander G. Digenis, MD, Koo Young Jung, MD, Patricia Molina, MD, PhD, Kareem Jabbour, BS, Phillip Williams, BS, and Naji Abumrad, MD, FACS

Enteral Nutritional Support Enhances Cognitive Recovery After Severe Closed Head Injury 29
Anthony P. Borzotta, MD, FACS, Anne Osborne, MS, Faith Bledsoe, MS, Joanne Paxton, RD, Shirley Mardesic, RD, John Pennings, MD, and Beth Papasadero, RN

Chapter II—Shock/Trauma

Concussive Brain Injury Adversely Affects Hemodynamic Compensation During Hemorrhagic Shock 32
Michael M. Law, MD, H. Gill Cryer, MD, PhD, FACS, and David A. Hovda, PhD

Dehydration State and Hypertonic Saline Resuscitation of Shock: Short- and Long-Term Effects on Renal Function 35
Hung S. Ho, MD, Jill L. Sondeen, PhD, Michael A. Dubick, PhD, and Robert A. Gunther, PhD

Resuscitation with Diaspirin-Cross-Linked Hemoglobin (DCLHb®) Restores Subcutaneous Oxygen Tension as well as Blood in Rats 40
Craig C. Powell, MD, Scot C. Schultz, MD, David G. Burris, MD, FACS, William R. Drucker, MD, FACS, and Diana S. Malcolm, PhD

Assessment of Outcome Following Hemorrhagic Shock by Dynamic Monitoring of Intracellular Bioenergetics 43
Darren V. Mann, FRCS, Eve DeRosa, BA, Jan D. Rounds, BS, Jonathan Rose, BA, Malcolm K. Robinson, MD, Douglas W. Wilmore, MD, FACS, and Danny O. Jacobs, MD, FACS

Pentoxifylline Decreases CD18 Expression and Attenuates Ischemia Reperfusion Injury in the Rabbit 46
Richard E. Royal, MD, Victor F. Garcia, MD, FACS, Gajra Arya, MS, and Moritz M. Ziegler, MD, FACS

The Role of Neuroendocrine and Prostanoid Response in Trauma-Induced Suppression of Macrophage Function 48
Alex C. Cech, MD, Emery Minnard, MD, and John M. Daly, MD, FACS

Randomized Phase I/II Trial of a Macrophage-Specific Immunomodulator (PGG-GLUCAN) in High-Risk Surgical Patients 51
Timothy J. Babineau, MD, Peter Marcello, MD, Wendy Swails, RD, Andrew Kenler, MD, Eric Wakshull, PhD, Fred Oldham, MD, Bruce Bistrian, MD, PhD, and R. Armour Forse, MD, PhD, FACS

Exogenous Delivery of Nitric Oxide: A Novel Treatment for Toxin-Mediated Hepatocyte Injury 53
Paul C. Kuo, MD, Adam Slivka, MD, PhD, Douglas Wilmore, MD, FACS, and Joseph Loscalzo, MD, PhD

Limited Efficacy of Inhaled Nitric Oxide in a Porcine Model of Severe Acute Lung Injury 55
Nishit S. Shah, MB, ChB, Don K. Nakayama, MD, FACS, Isuta Nishio, MD, Taiyo Imai, MD, Timothy D. Jacob, MD, Renee Exler, RRT, Timothy R. Billiar, MD, Etsuro K. Motoyama, MD, Samuel A. Yousem, MD, and Andrew B. Peitzman, MD, FACS

The Lymphatic System as a Route for Gut Bacterial Spread in Hemorrhagic Shock 58
Alex Shnaper, MD, Moshe Michowitz, MD, Franklin Greif, MD, FACS, and Shlomo Lelcuk, MD

Application of a Bioartificial Liver (BAL) in a New Model of Acute Fulminant Hepatitis 61
Timothy D. Sielaff, MD, Scott L. Nyberg, MD, PhD, Bruce Amiot, BS, Michael Y. Hu, MD, Madhusudan V. Peshwa, BTech, Florence J. Wu, BS, Wei-Sho Hu, PhD, and Frank B. Cerra, MD, FACS

Chapter III—Sepsis

Lipopolysaccharide (LPS) Induces AP-1 Nuclear Transcription Factor in Mouse Liver 64
Aphrodite M. Henderson, MD, R. Daniel Beauchamp, MD, FACS, Tien C. Ko, MD, Courtney M. Townsend, Jr, MD, FACS, and James C. Thompson, MD, FACS

Hepatocyte Nitric Oxide Production During Endotoxemia Requires Expression of GTP Cyclohydrolase mRNA and Synthesis of Tetrahydrobiopterin 67
David A. Geller, MD, Mauricio Di Silvio, MD, Andreas Nussler, PhD, Paul D. Freeswick, MD, Dan Nguyen, BS, Nishit S. Shah, MB, ChB, Richard L. Simmons, MD, FACS, and Timothy R. Billiar, MD

Staurosporine Prevents the Increase in Vascular Resistance Caused by Phospholipase A2 (PLA2) in the Rat Hindquarter 69
Anthony Rizzo, MD, J. Raymond Fletcher, MD, PhD, FACS, and Aubrey E. Taylor, PhD

β-Adrenergic Regulation of Gene Expression of Tumor Necrosis Factor-α in Human Macrophages 71
W. William Zhong, MD, MS, Sambasiva R. Chavali, PhD, and R. Armour Forse, MD, PhD, FACS

Endotoxin Pretreatment of Human Monocytes Alters Subsequent In Vitro Endotoxin-Triggered TNF, IL-1, IL-6, and PGE_2 Release 74
Michael A. West, MD, PhD, FACS, Mary H. Li, MD, Karen Close, BS, Robin Manthei, and Melvin P. Bubrick, MD, FACS

The Pivotal Role of Tumor Necrosis Factor (TNF) in Producing Endothelial Cell Dysfunction in Sepsis 77
Ping Wang, MD, Zheng F. Ba, BS, and Irshad H. Chaudry, PhD

Enrichment of Plasma with ED_1-Cellular Fibronectin in Trauma Patients with or Without Postinjury Sepsis 79
Toufic A. Rizk, MD, Paul B. Kreienberg, MD, John B. Fortune, MD, Edward Lewis, and Thomas M. Saba, PhD

Reduced Contractile Response to Extracellular (Ca^{2+}) in Endotoxic Rat Atria Is Bypassed by Controlled Hypothermia 83
Kenneth L. Campbell, MD, and R. Armour Forse, MD, PhD, FRCSC, FACS

Attenuation of Endotoxin-Induced Acute Lung Injury by Pentoxifylline and HWA-138: Evidence for a PMN-Dependent Mechanism 85
Hans Hoffmann, MD, Stefan Endres, MD, Michael Spannagl, MD, Marianne Jochum, PhD, Thomas A. Raffin, MD, and Friedrich W. Schildberg, MD, PhD, FACS

New Treatment for Severe Sepsis and Septic Multiple Organ Failure (MOF) Patients by Extracorporeal Endotoxin Removal with a Polymyxin B Immobilized Fiber Column 88
Kazuyoshi Hanasawa, MD, PhD, Masashi Kodama, MD, PhD, FACS, Hirohiko Aoki, MD, Yoshihiro Endo, MD, PhD, and Tohru Tani, MD, PhD

Taurolidine, an Anti-Lipopolysaccharide (LPS) Agent with Immunostimulatory Properties 90
R. William G. Watson, BSc, H. Paul Redmond, FRCSI, Julie McCarthy, MB, T. David Croke, PhD, Paul Burke, FRCSI, and David Bouchier-Hayes, MD, FACS

Neutrophil Function in Preoperative Patients: Correlation with Delayed-Type Hypersensitivity (DTH) Skin Test Response 92
John Yee, MD, and Nicolas V. Christou, MD, FRCSC, FACS

Chapter IV—Cytokines

D-Factor Mediates IL-6 but Not IL-1 Production Following TNF Administration In Vivo 95
Mark I. Block, MD, W. Scott Arnold, MD, Douglas L. Fraker, MD, and H. Richard Alexander, MD

Gamma-Interferon Primes Neutrophil Oxidative Responses Via Enhanced Cell Recruitment 97
Steven D. Tennenberg, MD, Mark J. Lieser, MD, and Debra E. Fey, BS

Dextran Sulfate Blockade of Platelet-Activating Factor (PAF)-Induced Neutrophil Priming Associated with Inhibition of $CD11_A$ Expression 100
Robert A. Read, MD, PhD, Ernest E. Moore, MD, Frederick A. Moore, MD, and Virginia S. Carl, MS

Chylomicrons Prevent Death from Platelet-Activating Factor in Rats 103
Zindaba L. Kumwenda, MD, Thomas E. Read, MD, Diana M. Stafforini, PhD, and Joseph H. Rapp, MD, FACS

Transforming Growth Factor Type β1 (TGF-β1) Is a Strong Anti-Inflammatory Cytokine That Inhibits Transcription, Translation, and Secretion of Inflammatory Mediators on Different Levels 105
Wolfgang Ertel, MD, Ina Karres, MS, Jean-Pierre Kremer, PhD, John S. Kenney, MA, Eugene Faist, MD, and Friedrich W. Schildberg, MD

Bactericidal/Permeability-Increasing Protein (BPI) Reduces Polymorphonuclear Neutrophil (PMN) Activation and Acute Lung Injury (ALI) in Pigs Challenged with Lipopolysaccharide (LPS) 108
Thomas J. VanderMeer, MD, Michael J. Menconi, PhD, Brian P. O'Sullivan, MD, Vera A. Larkin, MS, Hailong Wang, MD, and Mitchell P. Fink, MD, FACS

Impact of Anti-Endotoxin Therapy Utilizing Bactericidal/Permeability-Increasing Protein During Primate Bacteremia 111
Michael A. Rogy, MD, FACS (Austria), Hester S.A. Oldenburg, MD, Steve E. Calvano, PhD, William A. Thompson, MD, Walton Montague, MD, Sarah Stackpole, MD, Marrian N. Marra, MS, Lyle L. Moldawer, PhD, and Stephen F. Lowry, MD, FACS

Changes in Monocyte and Soluble Tumor Necrosis Factor (TNF) Receptors During Endotoxemia or Sepsis 114
Steve E. Calvano, PhD, William A. Thompson, MD, Susette M. Coyle, RN, Herbert F. de Riesthal, BA, Rhonda K. Trousdale, BS, Philip S. Barie, MD, FACS, Lyle L. Moldawer, PhD, and Stephen F. Lowry, MD, FACS

Insights into the Cellular Source of Soluble Forms of Tumor Necrosis Factor (TNF) and Interleukin-6 (IL-6) Receptors During Peritonitis 117
Alfred Ayala, PhD, Donna L. Lehman, BS, and Irshad H. Chaudry, PhD

Tumor Necrosis Factor Soluble Receptor p55: Endogenous Counter-Regulatory Glycoprotein 119
Alfred A. Santos, MD, Leland Shapiro, MD, Elizabeth A. Lynch, MS, Elaine F. Brown, MS, Elizabeth Chambers, MS, Danny O. Jacobs, MD, MPH, FACS, Charles A. Dinarello, MD, John Mannick, MD, FACS, and Douglas W. Wilmore, MD, FACS

Interleukin-1 Binding to the Type I, but Not Type II, Receptor Modulates In Vivo Acute-Phase Responses 121
Hester S.A. Oldenburg, MD, Bonnie P. Keeler, MD, Michael A. Rogy, MD, FACS (Austria), Douglas D. Lazarus, PhD, Richard Chizzonite, PhD, Lyle L. Moldawer, PhD, and Stephen F. Lowry, MD, FACS

Traumatic Injury: The Local Organ (Lung) Alters Cell Function 124
Jorge L. Rodriguez, MD, Norman P. Moore, BS, Cathie G. Miller, BS, Claudell Cox, BS, Warren L. Garner, MD, David J. Smith, MD, Daniel G. Remick, MD, and Peter A. Ward, MD

Chapter V—Alimentary Tract

Peptide YY (PYY) Gene Expression Is an Early Adaptive Response to Massive Small Bowel Resection 126
Anton J. Bilchik, MD, PhD, Oscar J. Hines, MD, Michael J. Zinner, MD, FACS, Thomas E. Adrian, PhD, MRCPath, Michael J. Skotzko, MS, A. James Moser, MD, David W. McFadden, MD, FACS, and Stanley W. Ashley, MD

Regulation of Intestinal Alkaline Phosphatase Gene Expression in HT-29 Cells 128
R.A. Hodin, MD, and S. Meng, MD

Mechanisms of Tissue-Specific Transcriptional Regulation of the Human Neurotensin Gene 131
B. Mark Evers, MD, Courtney M. Townsend, Jr, MD, FACS, and James C. Thompson, MD, FACS

Translational Control of Meal-Induced Jejunal Absorption 133
Oscar J. Hines, MD, Anton J. Bilchik, MD, PhD, Michael J. Skotzko, MS, Michael J. Zinner, MD, FACS, David W. McFadden, MD, FACS, A. James Moser, MD, Joshua J. Berger, BA, and Stanley W. Ashley, MD

Recovery of Gastrointestinal Motility After Laparoscopic Cholecystectomy 135
Robert E. Schmieg, Jr, MD, Bruce D. Schirmer, MD, FACS, Matthew J. Combs, PhD, Matthew Edwards, BA, and Angela Fariss, BS

Water and Electrolyte Transport in the Extrinsically Denervated Jejunum 137
Christopher P. Johnson, MD, Konrad H. Soergel, MD, Sushil K. Sarna, PhD, Yong-Ran Zhu, MD, Jeffrey L. Osborn, PhD, Gordon L. Telford, MD, Allan M. Roza, MD, and Mark B. Adams, MD

Effects of Ileo-Jejunal Transposition on Intestinal Mucosa and Pancreas 139
Kyo U. Chu, MD, Takashi Tsuchiya, MD, Jin Ishisuka, MD, Kazuo Sato, MD, Tatsuo Uchida, Courtney M. Townsend, Jr, MD, FACS, and James C. Thompson, MD, FACS

Postischemic Gut Is the Priming Bed for PMNS 142
Reginald J. Franciose, MD, Ernest E. Moore, MD, FACS, Frederick A. Moore, MD, FACS, Kaoru Koike, MD, Virginia S. Carl, MS, and Anirban Banerjee, PhD

A Neutrophil-Derived Factor Stimulates Intestinal Epithelial Cl-Secretion by a Microfilament-Dependent Mechanism 144
Jeffrey B. Matthews, MD

Neurohumoral Regulation of Colonic Motility 147
Anthony M. Vernava III, MD, FACS, Walter E. Longo, MD, Jeffrey D. Carter, MD, Bhugol Chandel, MD, Michael Niehoff, MS, Yashwant Deshpande, MS, John Standeven, PhD, Robert Phillips, MS, and Donald L. Kaminski, MD, FACS

Octreotide Pretreatment Attenuates Acute Radiation Enteritis 150
Jon B. Morris, MD, Nora Guerrero, RPh, Wendy L. Frankel, MD, Eugene Einhorn, MD, and Sydney Evans, DVM

Platelet-Activating Factor Increases Reactive Oxygen Metabolites in the Canine Stomach 152
Craig E. Amshel, BS, John G. Wood, PhD, Matthew E. Layton, MD, PhD, and Laurence Y. Cheung, MD, FACS

Cholinergic Effects on Ion Transport Properties of Cell Membranes in Gastric Surface Epithelium 155
David I. Soybel, MD

The Effect of Somatostatin on Bile Acid-Induced Gastric Mucosal Injury 157
Nipun B. Merchant, MD, Juan A. Cordero, Jr, MD, Daniel T. Dempsey, MD, FACS, Robert A. Cowles, BS, Richard E. Milner, BS, and Wallace P. Ritchie, Jr, MD, PhD, FACS

Nitric Oxide Modulates Endothelin-1-Induced Vasoconstriction in the Canine Stomach 160
Zhong Yu Yan, MD, John G. Wood, PhD, and Laurence Y. Cheung, MD, FACS

Functional Characteristics of the Intact, Incised, and Reconstructed Pylorus 163
Joseph J. Cullen, MD, and Keith A. Kelly, MD, FACS

Capsaicin Augmented Esophageal Mucosal Blood Flow—the Role of Endogenous Nitric Oxide 165
Lloyd D. McKie, MB, FRCS, Brian J. Dunkin, MD, John W. Harmon, MD, FACS, and Barbara L. Bass, MD, FACS

Secretin Potentiates Cholecystokinin-Stimulated Amylase Release from Pancreatic Acinar Cells by a Pertussis Toxin-Sensitive Mechanism 167
Richard J. Bold, MD, Jin Ishizuka, MD, Courtney M. Townsend, Jr, MD, FACS, and James C. Thompson, MD, FACS

Pancreatic Regeneration Gene (*reg*) Expression During Islet Growth in the Rat 170
Michael E. Zenilman, MD, Riccardo Perfetti, MD, and Alan R. Shuldiner, MD

Immunostimulation with Granulocyte Colony-Stimulating Factor To Prevent the Septic Complications of Acute Pancreatitis 172
Robert A. Rao, MD, George B. Kazantsev, MD, David W. Hecht, MD, Paolo Gattuso, MD, and Richard A. Prinz, MD, FACS

Expression of Basic Fibroblast Growth Factor During the Reparative Phase of Acute Pancreatitis 174
Luis A. Padilla, MD, Guillermo Gomez, MD, R. Daniel Beauchamp, MD, FACS, George H. Greeley, Jr, PhD, and James C. Thompson, MD, FACS

Effects of Cyclosporin A and FK506 on Acute Pancreatitis in Mice 177
Yoshiya Echigo, MD, Kazutomo Inoue, MD, FACS, Masafumi Kogire, MD, Shunichi Higashide, MD, Shouichirou Sumi, MD, Kyouichi Takaori, MD, Hirokazu Hayashi, MD, Thein Tun, MD, Kouichirou Uchida, MD, and Masayuki Imamura, MD, FACS

Biliary Proteins Are Important Structural Components of Cholesterol Carriers 179
Dilip K. Samantaray, MD, Rebecca Kolp, BS, Sarah D. Falconer, BA, Michael L. Tam, BS, Keith D. Lillemoe, MD, FACS, Henry A. Pitt, MD, FACS, and Pamela A. Lipsett, MD

Effect of Somatostatin and Secretin on Biliary Proteins 181
Giovanni Cucchiaro, MD, and William C. Meyers, MD, FACS

Crystalline Cholesterol, Bilirubin, and Calcium Hydroxyapatite Stimulate Human Peripheral Blood Mononuclear Cells to Release Interleukin-1 In Vitro 183
Jay B. Prystowsky, MD, Jayashree S. Huprikar, BS, Alfred W. Rademaker, PhD, and Robert V. Rege, MD, FACS

Gender Affects Sphincter of Oddi Response to Cholecystokinin .. 185
Sean Tierney, FRCSI, Zhiping Qian, MD, Pamela A. Lipsett, MD, Henry A. Pitt, MD, FACS, and Keith D. Lillemoe, MD, FACS

TPA and Vasopressin Stimulate Rat Hepatocyte Proliferation via Protein Kinase C-Dependent and -Independent Pathways 187
Hiroaki Imanishi, MD, Piyush C. Kothary, MS, Faizullah Y. Bhora, MD, Frederic E. Eckhauser, MD, FACS, and Steven E. Raper, MD

Interleukin-6 Blockade Impedes Recovery from Experimental Hepatectomy 190
Yuman Fong, MD, David C. Helfgott, MD, and Murray F. Brennan, MD, FACS

Microvascular Perfusion Failure and Leukocyte Adherence Are Determinants in Hepatic Ischemia/Reperfusion-Induced Organ Dysfunction 192
Michael D. Menger, MD, Julia Glasz, Brigitte Vollmar, MD, and Konrad Messmer, MD

Matrix Components Enhance Biotransformation Functions of a Bioartificial Liver (BAL) In Vitro Model 194
Michael Y. Hu, MD, Scott L. Nyberg, MD, PhD, Timothy D. Sielaff, MD, and Frank B. Cerra, MD, FACS

Hepatic Nitric Oxide Synthesis: Role of the Urea Cycle 197
Mauricio Di Silvio, MD, Andreas K. Nussler, PhD, David A. Geller, MD, Paul D. Freeswick, MD, Kenneth Dorko, BS, Richard L. Simmons, MD, FACS, and Timothy R. Billiar, MD

Insulin-Like Growth Factor One (IGF-I) Suppresses Hepatic Glucose Production in the Rat 200
Shahab Akhter, MD, Catherine Ruiz, BS, Dariush Elahi, PhD, and Dana K. Andersen, MD, FACS

Failure To Induce Oral Tolerance Following Mesenterico-Caval Shunt in Rats 203
Rong Yang, MD, Qi Liu, MD, Jay L. Grosfeld, MD, FACS, and Mark D. Pescovitz, MD, FACS

Chapter VI—Cardiothoracic Surgery

Newborn Myocardial Stunning Following Brief Prearrest Cold Perfusion: Its Prevention by Early Induction of Arrest 207
Sameh Barayan, MD, FRCSEd, Christo I. Tchervenkov, MD, FRCSC, FACS, and Dominique Shum-Tim, MD

The Distribution of Myocardial Blood Flow in Cyanotic and Normal Dogs 209
Ara K. Pridjian, MD, Edward L. Bove, MD, FACS, and Flavian M. Lupinetti, MD, FACS

Near-Infrared Spectroscopy for Noninvasive Cerebral Metabolic Monitoring During Congenital Heart Repair 211
Elizabeth A. Whitaker, MD, James R. Mault, MD, Jeffrey S. Heinle, MD, Andrew J. Lodge, MD, William J. Greeley, MD, Frans Jöbsis-VanderVliet, PhD, and Ross M. Ungerleider, MD, FACS

Inspired Carbon Dioxide ($FiCO_2$) Modulates Pulmonary/Systemic Flow Ratio in a Laboratory Model of a Single Ventricle 213
Christian Pizarro, MD, Gerardo A. Mora, MD, Scott D. Gullquist, MD, Avital Cnaan, PhD, Marshall L. Jacobs, MD, FACS, and William I. Norwood, MD, PhD, FACS

Effects of Prostaglandin E_1 and Nitroglycerin on the Newborn Pig Pulmonary Circulation 215
Patrick W. Domkowski, MS, John T. Cockerham, MD, Anthony B. Fazzone, MS, YiNing Wang, MD, Alain Bel, MD, Peter A. Kot, MD, Ali R. Analouei, PhD, Robert H. Messier, MD, Robert B. Wallace, MD, FACS, and Richard A. Hopkins, MD, FACS

Characterization of the Immune Response to Cardiac Myxomas .. 218
Mitchell J. Magee, MD, Si M. Pham, MD, Sarun Suwan, Adrianna Zeevi, PhD, and Brack G. Hattler, MD, PhD, FACS

Improved Short- and Long-Term Recovery After an Acute Myocardial Infarct Treated by Transmyocardial Laser Revascularization 220
Keith A. Horvath, MD, Wendell J. Smith, MD, Rita G. Laurence, BS, John G. Byrne, MD, Frederick J. Schoen, MD, PhD, and Lawrence H. Cohn, MD, FACS

Fast Track Recovery of the Cardiac Surgical Patient 223
David W. Deaton, MD, Richard Engelman, MD, FACS,
John Rousou, MD, FACS, Joseph Flack III, MD
Philip Allmendinger, MD, FACS, Lee Ellison, MD, FACS,
Chester Humphrey, MD, FACS, Reni Kalfin, PhD, and
Dipak Das, PhD

The Influence of Coronary Stenosis on Transfusion Need 226
Jeffrey P. Schwartz, MD, Michael J. Ludkowski, MD,
Lawrence J. Segil, MD, David J. Miletich, PhD,
William R. Law, PhD, and Steven A. Gould, MD, FACS

Determinants of Endothelial Cell Presence in Cryopreserved Human
Allograft Valves 228
Catherine F. Lewis, MD, Thomas T. Tsai, James M. Kneebone, MS,
Edward L. Bove, MD, FACS, Michael A. Shork, PhD,
Kelvin G.M. Brockbank, PhD, and Flavian M. Lupinetti, MD, FACS

Intramyocardial Assessment of Regional Ischemia During Maximally
Unloaded Contraction 230
Paul G. Burns, MD, Irvin B. Krukenkamp, MD,
Christopher A. Caldarone, MD, Glenn R. Gaudette, MSc, and
Sidney Levitsky, MD, FACS

Effect of Cardiopulmonary Bypass on Erythrocyte Intracellular Calcium
Concentration 232
Guy R. Engelmann, MD, James C. Todd III, MD,
Daniel L. Mollitt, MD, FACS, Maria Jordan, MD,
Richard J. Peterson, MD, and Eric L. Ceithaml, MD, FACS

Selective Blockade of Nucleoside Transport Channels Prevents
Preconditioning of Rabbit Myocardium 234
Robert S. Walsh, MD, Anwar S. Abd-Elfattah, PhD,
John J.F. Daly, BA, Andrew S. Wechsler, MD, FACS, and
James M. Downey, PhD

Inhibition of Cytosolic Calcium Accumulation in the Ischemic Rabbit Heart with High Potassium and Magnesium Cardioplegia: Mechanism of Action 237
Takuro Tsukube, MD, PhD, James D. McCully, PhD, and Sidney Levitsky, MD, FACS

Myocyte Contractile Function and Inotropic Responsiveness Following Hypothermic Potassium Cardioplegia 239
John R. Handy, MD, Francis G. Spinale, PhD, Rupak Mukherjee, MS, and Fred A. Crawford, MD, FACS

Falling Myocardial pH Reflects Ischemic Alterations During Continuous Warm Retrograde Cardioplegic Arrest 242
Russell F. Stahl, MD, Babs R. Soller, PhD, Charles Hsi, MD, Jian-Ming Li, MD, Janice BelleIsle, BA, Mark Knox, MS, Kevin Cotter, CCP, and Thomas J. Vander Salm, MD

Blood Cardioplegia Enhanced with an Organic Nitric Oxide Donor Reverses Postischemic Ventricular Dysfunction and Coronary Endothelial Damage 245
Katsuhiko Nakanishi, MD, Zhi-Qing Zhao, MD, PhD, Jakob Vinten-Johansen, PhD, Dudley A. Hudspeth, MD, and John W. Hammon, Jr, MD, FACS

Does Senescence Alter Myocardial Tolerance to Blood Cardioplegia? 247
Christopher A. Caldarone, MD, Irvin B. Krukenkamp, MD, Paul G. Burns, MD, Glenn R. Gaudette, MSc, Joshua P. Schulman, and Sidney Levitsky, MD, FACS

Adenosine Pretreatment Increases Cytosolic Phosphorylation Potential and Attenuates Postischemic Cardiac Dysfunction in Swine 249
Zhandong Zhou, MB, MS, Rolf Bünger, MD, PhD, Robert D. Lasley, PhD, Julia O. Hegge, BS, Robert M. Mentzer, Jr, MD, FACS

Enhancement of Blood Cardioplegia with Adenosine Avoids Postischemic Dysfunction in Severely Injured Hearts 252
Dudley A. Hudspeth, MD, Katsuhiko Nakanishi, MD, Jakob Vinten-Johansen, PhD, Zhi-Qing Zhao, MD, PhD, D. Scott McGee, BS, and John W. Hammon, Jr, MD, FACS

Thyroid Hormone Affects Myocardial Performance but Not Sarcoplasmic Reticular Ca^{2+}-ATPase in the Isolated Blood-Perfused Rat Heart 255
Mai Ding, MD, Anwar Abd-Elfattah, PhD, and Andrew Wechsler, MD, FACS

Accelerated Functional Recovery of Stunned Myocardial Regions Perfused by Bypass Grafts with Intact Endothelium: Evidence of Increased Endogenous Graft Endothelial Prostanoid Synthesis 257
Kunio Fujita, MD, Barbara Robinson, MD, Yoshiro Matsui, MD, Matthew Chow, MD, Terumasa Morita, MD, Gerald McGrath, Hartzell V. Schaff, MD, and James J. Morris, MD

Systemic Glucose Intolerance Induced by Extracorporeal Circulation During Cardiopulmonary Bypass 260
You Su Sun, MD, Robert M. Lust, PhD, Terry O. Norton, MD, Susan J. Pabst, MD, Masaki Otaki, MD, Richard S. Zeri, MD, Steven B. Hopson, MD, and W. Randolph Chitwood, Jr, MD, FACS

Negative Inotropic and Metabolic Effects of the Nitric Oxide Precursor L-Arginine: Partial Prevention by Amiloride 264
Koh Takeuchi, MD, Hung Cao-Danh, PhD, Paul Glynn, PhD, Elena Simplaceanu, MS, Francis X. McGowan, MD, and Pedro J. del Nido, MD, FACS

Evidence for Inducible Nitric Oxide Synthase Expression in the Heart 267
Paul D. Freeswick, MD, Mauricio Di Silvio, MD, Andreas K. Nussler, PhD, Nishit S. Shah, MB, ChB, Dan Nguyen, BS, Timothy R. Billiar, MD, Mitchell S. Finkel, MD, and Brack G. Hattler, MD

Nitric Oxide Produced by Cytokine-Activated Rat Pulmonary Artery Smooth Muscle Cells Is Cytotoxic to Cocultured Rat Pulmonary Artery Endothelium 269
Keith R. Thomae, MD, Stephen Morrow, MD, Paul Davies, PhD, Bruce R. Pitt, PhD, Richard L. Simmons, MD, FACS, Timothy R. Billiar, MD, and Don K. Nakayama, MD, FACS

Cytokine-Mediated Induction of Nitric Oxide Biosynthesis in Fetal Cardiac Myocytes Inhibits Cell Proliferation 272
Ronald D. Curran, MD, Robert L. Quigley, MD, DPhil, Mark D. Price, BS, John C. Alexander, Jr, MD, FACS, and Robert W. Anderson, MD, FACS

Endothelial-Dependent and -Independent Coronary Flow Reserve Following Graded Ischemia 274
Quanmei Deng, MD, Alfonso G. Scicli, PhD, Carol Lawton, and Norman A. Silverman, MD, FACS

Protamine Impairs Endothelium-Dependent Relaxation in Canine Coronary Arteries 276
John F. Seccombe, MD, Marilyn R. Oeltjen, Paul J. Pearson, MD, PhD, and Hartzell V. Schaff, MD, FACS

PDGF Production by Human Saphenous Vein and Internal Mammary Artery Segments in Organ Culture 279
David A. Margolin, MD, Ghassan Abdallah, BA, Ricardo Rao, MD, Mark J. Botham, MD, FACS, Paul L. Fox, PhD, and Linda M. Graham, MD, FACS

The Effects of Intermittent Flow Patterns on Vascular Reactivity and Hyperplasia in Aortocoronary Bypass Grafts 283
Steven B. Hopson, MD, Robert M. Lust, PhD, Jeffrey B. Dattilo, MD, Richard S. Zeri, MD, You Su Sun, MD, Masaki Otaki, MD, Jack E. Brinn, PhD, and W. Randolph Chitwood, Jr, MD, FACS

Vein Valve Closure, Pressure Trap, and Graft Stenosis 286
Mano J. Thubrikar, PhD, Francis Robicsek, MD, James Rielly, MD, and Brett L. Fowler, BS

Dynamic Left Ventricular Geometry and Function During Atrial and Ventricular Pacing in Conscious Dogs 288
Clarence H. Owen, MD, David J. Esposito, BA, James W. Davis, PhD, and Donald D. Glower, MD

Milrinone Improves Right Ventricular Dysfunction After Cardiopulmonary Bypass by Reducing Pulmonary Vascular Resistance and Not from Contractility Enhancement 291
Wendel J. Smith, MD, Lishan Aklog, MD, Michael P. Murphy, MD, Robert J. Rizzo, MD, Rita G. Laurence, BS, Gregory S. Couper, MD, Lawrence H. Cohn, MD, FACS, and Robert F. Appleyard, PhD

Mixed Xenogeneic Bone Marrow Chimerism (Mouse + Rat → Mouse) Induces Donor-Specific Tolerance for Cardiac Grafts Across a Species Barrier 294
Yolonda L. Colson, MD, PhD, Kathryn J. Zadach, BS, and Suzanne T. Ildstad, MD

Right Ventricular Mechanics During Chronic Pulmonary Hypertension 296
Osvaldo Juniti Yano, MD, Daniel Chai, BA, Daniel Burkhoff, MD, PhD, Henry Michael Spotnitz, MD, FACS, and Craig Richey Smith, MD, FACS

Endothelin-1 Gene Expression in Pulmonary Hyperemia 300
Bryan F. Meyers, MD, Dean M. Donahue, MD, Hon Chi Suen, MD, and John C. Wain, MD

CD11B Adhesion Is Critical for Gut Ischemia/Reperfusion Induced Lung Injury 304
Kaoru Koike, MD, Ernest E. Moore, MD, FACS, Frederick A. Moore, MD, FACS, Robert A. Read, MD, Fernando J.W. Kim, MD, and Virginia S. Carl, MS

A Working Model for Evaluating Lung Transplant Preservation Methods 306
Irving Shen, MD, Karyn S. Kunzelman, PhD, Craig R. Vocelka, CCP, Edward D. Verrier, MD, FACS, and Richard P. Cochran, MD, FACS

The Extended Use of the Autoperfusing Heart-Lung Preparation for Electrophysiologic Studies 309
David B. Glick, MD, Christopher S. Cronin, MD, Robert D.B. Jaquiss, MD, and T. Bruce Ferguson, Jr, MD, FACS

Development of an Isolated Blood-Perfused Working Rat Lung Model 312
Shigeyuki Sasaki, MD, PhD, James D. McCully, PhD, and Joseph LoCicero III, MD, FACS

Biventricular Remodeling After Single Lung Transplantation for Pulmonary Hypertension 315
Stephan G. Wyers, MD, Lawrence L. Creswell, MD, Michael J. Moulton, MD, William H. Perman, PhD, Michael W. Vannier, MD, Barna A. Szabó, PhD, and Michael K. Pasque, MD, FACS

The Effects of Hypothermia on the Release of Excitatory Amino Acids in Spinal Cord Ischemia 319
Chris K. Rokkas, MD, Christopher S. Cronin, MD, Takashi Nitta, MD, Douglas C. Loebner, PhD, Dennis W. Choi, MD, PhD, Thomas H. Wareing, MD, FACS, and Nicholas T. Kouchoukos, MD, FACS

Patterns of Spinal Cord Blood Flow During and After Aortic Cross-Clamping in the Rat Model 322
Fabrizio Follis, MD, Kevin B. Miller, MD, Oscar U. Scremin, MD, PhD, Stuart Pett, MD, Randolph M. Kessler, MD, and Jorge A. Wernly, MD

The Interaction of Growth Factors and MyoD During Skeletal Muscle Conditioning for Cardiomyoplasty 325
Steven J. Hoff, MD, Donald F. Pierce, Jr, MD, James R. Stewart, MD, James A. Atkinson, MD, PhD, Charles C. Elkins, MD, Walter H. Merrill, MD, and Harvey W. Bender, Jr, MD

Skeletal Muscle Ventricle Aortic Counterpulsation: Chronic Function with and Without Propranolol-Induced Heart Failure 327
Gregory A. Thomas, MD, Huiping Lu, MD, Hidehiro Nakajima, MD, PhD, Robert Fietsam, Jr, MD, Susuma Isoda, MD, PhD, Frank W. Mocek, MD, Robert L. Hammond, BS, Hisako Nakjima, MD, and Larry W. Stephenson, MD, FACS

Mechanism of Cardiomyoplasty: Dynamic Three-Dimensional Magnetic Resonance Reconstructions in Chronic Heart Failure 330
Peter W. Cho, MD, Christopher C. Moore, BSE, Howard R. Levin, MD, Joshua E. Tsitlik, PhD, Elliot R. McVeigh, PhD, Hani N. Sabbah, PhD, Timothy J. Gardner, MD, and Michael A. Acker, MD

Chapter VII—Vascular Surgery

In Vivo Fate of LAC Z-Transduced Endothelial Cells Seeded on ePTFE Thoracoabdominal Vascular Prostheses in Dogs 334
Rachel M. Podrazik, MD, Thomas A. Whitehill, MD, Thomas A. Komorowski, MS, Katherine H. Karo, MS, Louis M. Messina, MD, FACS, and James C. Stanley, MD, FACS

Measurement of Microvascular Blood Flow by F-19 NMR Angiography 337
Ahmet Berkmen, MD, Barbaros Ozdemirel, PhD, Orhan Nalcioglu, PhD, and Alan G. Wile, MD, FACS

Covalent Linkage of Proteins to Collagen in Vascular Grafts 340
Ryan A. Brown, MS III, Brian E. Brigman, MS IV, Christopher W. Baird, BS, Albert J. Banes, PhD, and Blair A. Keagy, MD, FACS

Propranolol Reduces the Size of Aortic Aneurysms in Hypertensive Rats 343
Jeffrey M. Slaiby, MD, Michael A. Ricci, MD, FACS, Gregory R. Gadowski, MD, Edith D. Hendley, PhD, and David B. Pilcher, MD, FACS

Distal Arteriovenous Fistula Inhibits Experimental Anastomotic Intimal Thickening 345
Hisham S. Bassiouny, MD, Dainis Krievins, MS, Seymour Glagov, MD, Gus Abu-Hamad, MD, and Christopher K. Zarins, MD, FACS

Anti-CD4 Monoclonal Antibody Therapy Alters Cytokine Expression and Limits Intimal Hyperplasia Following Arterial Balloon Injury 347
David H. Adams, MD, Mohamed H. Sayegh, MD, Wayne W. Hancock, MD, PhD, Lauri R. Wyner, BA, and Morris J. Karnovsky, MBBCH, DSc

Early Role of Collagen Type I on Smooth Muscle Cell Phenotype Change and Intimal Hyperplasia 349
Eric T. Choi, MD, Shaping Sun, MD, William Parks, PhD, Allan D. Callow, MD, PhD, FACS, Jeffrey D. Trachtenberg, MD, and Una S. Ryan, PhD

Compliance and the Effect of Photodynamic Therapy of Arteries ... 351
N.R. ChandraSekar, MD, Gilbert L'Italien, BS, David F. Warnock, Sandip Dhara, BS, William M. Abbott, MD, FACS, and Glenn M. LaMuraglia, MD, FACS

Prevention of Platelet Attachment to a Biomaterial Using the GPIIb/IIIa-Specific Peptide: TP9201 355
Kevin O. Garrett, MD, Juerg F. Tschopp, PhD, Karyn L. Connolly, BS, David L. Steed, MD, Michael D. Pierschbacher, PhD, and Peter C. Johnson, MD

Antithrombotic Strategies To Minimize Surgical Bleeding 356
Robert C. Allen, MD, Alan B. Lumsden, MBChB, Andrew B. Kelly, DVM, and Laurence A. Harker, MD

Complete Replacement of Infected Vascular Prostheses with Tubed Myofascioperitoneal Flap 360
Grady B. Core, MD, Estéban Reyes, MD, Beatrice Engels, BS, and Luis O. Vasconez, MD, FACS

Altered Endothelial Cell Eicosanoid Biosynthesis During Experimental Ischemia and Reperfusion: Mechanisms and Subcellular Localization 364
Michael T. Watkins, MD, FACS, Hassan Al-Badawi, MD, Eric Dubois, MD, David M. Larson, PhD, Willard C. Johnson, MD, and Christian C. Haudenschild, MD

Inhibition of Leukocyte Adhesion at Reperfusion Decreases Tissue Damage in Postischemic Skeletal Muscle 367
Robert J. Ferrante, MD, Michael B. Silva, Jr, MD, Michael Resnikoff, MD, Robert W. Hobson II, MD, FACS, and Walter N. Durán, PhD

Protection of the Ischemic Spinal Cord by the Hydroxyl Radical Scavenger Dimethylthiourea 370
Willem Wisselink, MD, Mark O. Becker, MD, Justin H. Nguyen, MD, Samuel R. Money, MD, and Larry H. Hollier, MD, FACS, FACC

b-FGF Alters Polyamine Metabolism in Vascular Smooth Muscle Cells 372
Boulos Toursarkissian, MD, Eric D. Endean, MD, FACS, Shewan M. Aziz, PhD, and Gloria Gellin, MS

In Vivo Implantation of Genetically Modified Autologous Vein Grafts: Analysis of Short-Term Transgene Expression 375
Guy LeClerc, MD, FRCPC, Satoshi Takeshita, MD, Joseph J. Stetz, MD, Riemer Riessen, MD, Jeffrey M. Isner, MD, FACC, and James F. Symes, MD, MSc, FRCSC, FACS

Mechanical Perturbation of Single Smooth Muscle Cells Stimulates Intracellular Calcium Release That Is Propagated to Surrounding Cells 377
Christopher W. Baird, BS, Albert J. Banes, PhD, Brian E. Brigman, MS IV, D. Dorofi, MS III, S. Boitano, PhD, M.J. Sanderson, PhD, and Blair A. Keagy, MD, FACS

Endothelial Cell Effect on Smooth Muscle Cell Morphology 380
Richard J. Powell, MD, Jack L. Cronenwett, MD, FACS, Robert J. Wagner, BS, Susan E. O'Connor, MD, and Mark F. Fillinger, MD

Nitric Oxide Precursor Speeds Recovery of Endothelial-Dependent Vasorelaxation and Reduces Intimal Hyperplasia After Endothelial Injury 384
Wallace C. Tarry, MD, and Raymond G. Makhoul, MD

Diabetes Mellitus Increases Intimal Hyperplasia and Smooth Muscle Cell Dysfunction in Experimental Vein Grafts 388
Mark G. Davies, MD, FRCSI, Jay H. Kim, MD, Michael L. Klyachkin, MD, Young C. Kim, MD, Lizzie Barber, BSN, Einar Svendsen, MD, PhD, Culley C. Carson III, MD, and Per-Otto Hagen, PhD

The Role of PECAM-1 in Vascular Graft Endothelialization 391
Lisa D. Benton, MD, Gautam Bijur, BS, and Ralph S. Greco, MD, FACS

Fibroblast Growth Factor-1 (FGF-1) Immobilization Increases Endothelialization Without Intimal Hyperplasia in Canine 30-cm ePTFE Grafts 394
J.L. Gray, MD, G.C. Zenni, MD, J. Ellinger, D. Ren, MD, D.U. Kim, MD, J. Winkles, PhD, W.H. Burgess, PhD, and H.P. Greisler, MD, FACS

Chapter VIII—Transplantation

Evidence for the Role of Preformed Antibody in Mediating Cardiac Rejection in the Hamster-to-Rat Xenograft Model 397
Guo-Du Wu, MD, Donald V. Cramer, DVM, PhD, Carlos Cosenza, MD, Philip Tuso, MD, Gabriella Eiras-Hreha, PhD, Hong Kai Wang, MD, and Leonard Makowka, MD, PhD

Rejection of Guinea Pig Cardiac Xenografts Post-Cobra Venom Factor Therapy Is Associated with Endothelial Cell Activation and Mononuclear Cell Infiltration 399
Martin L. Blakely, MD, Willem J. Van der Werf, MD, Wayne Hancock, MD, PhD, and Fritz H. Bach, MD

A Sublethal Approach To Achieve Stable Mixed Xenogeneic Chimerism (Mouse + Rat → Mouse) and Tolerance 402
Ashraf Y. Abou El-Ezz, MD, Sallie S. Boggs, PhD, Peter C. Johnson, MD, Hua Li, MD, Kenneth D. Patrene, BS, Camillo Ricordi, MD, and Suzanne T. Ildstad, MD

Immune Tolerance by Intrathymic Implantation of Genetically Engineered Cells 404
Stuart J. Knechtle, MD, Jue Wang, MD, Shoushu Jiao, MD, and Jon Wolff, MD

Gene Transfer of TGFβ and Viral IL-10 Prolong Cardiac Allograft Survival 407
Kenneth D. Chavin, MD, Lihui Qin, MD, Hideaki Tahara, MD, PhD, Paul D. Robbins, PhD, Michael T. Lotze, MD, and Jonathan S. Bromberg, MD, PhD

Prolongation of Primate Cardiac Allograft Survival by Short Course Monotherapy with an LFA-3-IgG_1 Fusion Protein 409
Robert E. Michler, MD, Patricia Chisholm, MPH, Paula S. Hochman, PhD, Richard J. Kaplon, MD, Carole L. Berger, PhD, Gerard R. Majeau, MS, Glenn T. Miller, BA, Cynthia A. Williams, BS, Pawel A. Kwiatkowski, MD, Avijit Mitra, MD, He Xu, MD, Werner Meier, Barbara P. Wallner, PhD, and Charles C. Marboe, MD

T Cell Costimulation by Autologous Endothelial Cells 412
Emina H. Huang, MD, Ronald M. Ferguson, MD, PhD, and Charles G. Orosz, PhD

The Expression of Extracellular Matrix Proteins Represents an Integral Part of the Host Immune Response in Organ Transplantation 415
Jerzy W. Kupiec-Weglinski, MD, PhD, Ana J. Coito, PhD, Jochen Binder, MD, and Maria de Sousa, PhD

Reduced Functioning Kidney Mass Accelerates Chronic Rejection in Rats 418
Uwe W. Heemann, MD, Stefan G. Tullius, MD, Haruhito Azuma, MD, and Nicholas L. Tilney, MD, FACS, FRCS

Acute Cyclosporin-Induced Renal Vasoconstriction Is Mediated by Thromboxane A_2 420
Ian T.M. Bloom, MD, FRCS, Frederick R. Bentley, MD, FACS, and R. Neal Garrison, MD, FACS

Cyclosporin A Induces Impairments in Blood Flow and Absorptive Function of Transplanted Rat Small Intestine 423
Shuching Sun, MD, Stuart M. Greenstein, MD, FACS, Richard S. Schechner, MD, David Senitzer, PhD, and Vivian A. Tellis, MD, FACS

Intragraft Expression of Interleukin-2 and Interferon-Gamma Messenger RNA Is a Predictor of Rejection in Rat Small Intestine Allografts 426
Douglas G. Farmer, MD, Sue V. McDiarmid, MD, Jon Kuniyoshi, BS, Marie E. Robert, MD, Abraham Shaked, MD, PhD, and Ronald W. Busuttil, MD, PhD

Semiquantitative Analysis of Cytokine Gene Expression During Intestinal Allograft Rejection in the Mouse 429
Douglas Quan, MD, David R. Grant, MD, FRCSC, Robert Z. Zhong, MD, Zheng Zhang, MD, Zi-Qin Yin, BSc, Bertha M. Garcia, MD, FRCPC, John H. Duff, MD, FRCSC, FACS, and Anthony M. Jevnikar, MSc, MD, FRCPC

Design and Transplantation of Enterocyte-Polymer Constructs: A Small Animal Model for Neointestinal Replacement in Short Bowel Syndrome 432
Gregory M. Organ, MD, David J. Mooney, PhD, Linda K. Hansen, PhD, Betsy Schloo, MD, and Joseph P. Vacanti, MD

Prevention of GVHD with UVB-Irradiated Haploidentical Bone Marrow and Spleen Cells in Rat Bone Marrow and Small Bowel Transplantation 436
Nepal C. Chowdhury, MD, Ming-Xing Jin, MD, Mark A. Hardy, MD, FACS, and Soji F. Oluwole, MD, FRCSC, FACS

Glutamine Reduces Bacterial Translocation After Small Bowel Transplantation in Cyclosporin-Treated Rats 439
Wei Zhang, MD, Wendy Frankel, MD, Allison Bain, BA, David Choi, BA, David Klurfeld, PhD, and John L. Rombeau, MD, FACS

Insulin-Like Growth Factor-1 (IGF-1) Results in Successful Fetal Pancreas (FP) Transplantation in the Intramuscular (IM) Site 442
Xuegong Wang, MD, PhD, Larisse K. Lee, Gregg A. Adams, MD, Edward J. Alfrey, MD, and Donald C. Dafoe, MD, FACS

Local Immunosuppression of Pancreatic Islet Allografts by Cotransplantation of Cells Engineered To Secrete CTLA4Ig 444
A. Alfred Chahine, MD, Christian Stoeckert, PhD, Peter S. Linsley, PhD, James A. O'Neill, Jr, MD, FACS, and Henry T. Lau, MD

Vulnerability of Class I-Deficient Mouse Islet Allografts to Secondary but Not Primary Alloimmunity 446
James F. Markmann, MD, PhD, Niraj M. Desai, James I. Kim, Hamid Bassiri, Jon S. Odorico, MD, and Clyde F. Barker, MD, FACS

Normal Rat Hepatocytes Are Superior to Liver Tumor Cells as the Source of Hepatic Function in a Gel-Entrapment Bioartificial Liver 448
Scott L. Nyberg, MD, PhD, Rory P. Remmel, PhD, Henry J. Mann, Pharm D, Wei-Shou Hu, PhD, and Frank B. Cerra, MD, FACS

Biochemical Detection of Rejection Occurring in Cardiac Allografts by Serum Heart Fatty Acid Binding Protein (H-FABP) 451
Paul E. Morrissey, MD, and William H. Marks, MD, PhD, FACS

15-Deoxyspergualin (DSG) and Cyclosporin (CsA) Act Synergistically To Prolong the Survival of Rat Cardiac Allografts 454
Hiromu Kaji, MD, PhD, Ting-Chao Chou, PhD, David E.R. Sutherland, MD, PhD, Edic Stephanian, MD, and Paul F. Gores, MD

Pulmonary Hemodynamics Following Reduced and Single Lung Transplantation in a Porcine Model 457
Alejandro Gandsas, MD, Ali Sadeghi, MD, Craig K. Mezrow, MS, Peter S. Midulla, MD, Otto Dapunt, MD, David D'Alessandro, BS, Howard Shiang, DVM, and Randall B. Griepp, MD

Chapter IX—Surgical Oncology

Osteolytic Activity by Breast Tumor Cells Is Mediated in Part by Both Transforming Growth Factor-Alpha and Interleukin-1-Alpha 460
Arnold Tabuenca, MD, Subburaman Mohan, PhD, Carlos Garberoglio, MD, FACS, Patrick Borgen, MD, FACS, and Thomas Linkhart, PhD

Identification of a 33-kDa Intron-Binding Protein Required for Transformation Ability of the *p53* Gene In Vitro 462
Marty T. Sellers, MD, Renu Kakar, MA, Ratna Ray, PhD, and Samuel W. Beenken, MD

Abnormal Hepatic Glucose Production from Lactate in Tumor Rats 464
Katherine J.M. Liu, MD, FACS, and Jehad A. Jarad, BS

The Role of Host CD4+ and CD8+ T Cells During TIL + rIL2 Treatment in Cancer Immunotherapy 467
Ulrike L. Burger, MD, Maximilian P. Chang, BA, Stacy L. Adams, BA, Deric D. Schoof, PhD, and Timothy J. Eberlein, MD, FACS

Effect of Polyunsaturated Phospholipids (PUFA) on Colon Tumor Cell Proliferation and Carcinoembryonic Antigen (CEA) Expression .. 470
Cheng-ji Cai, MD, Aniruddha Gangopadhyay, PhD, Mark Walsh, MSc, Peter Thomas, PhD, and R. Armour Forse, MD, PhD, FRCSC, FACS

p53 Mutations as Indicators of Colorectal Metastatic Disease 472
William Kastrinakis, MD, Lowell Sherman, BS, Ian Summerhayes, PhD, and Glenn Steele, Jr, MD, PhD, FACS

The Suppression of Tumor Metastases by a Primary Tumor 474
Michael O'Reilly, MD, Rosalind Rosenthal, PhD, E. Helene Sage, PhD, Stacy Smith, Lars Holmgren, PhD, Marsha Moses, PhD, Yuen Shing, PhD, and Judah Folkman, MD, FACS

Systemic Transfer of Superantigen-Activated T Cells Leads to the Regression of Experimental Brain Tumors in Mice 477
Jeffrey J. Sussman, MD, Alfred E. Chang, MD, FACS, and Suyu Shu, PhD

Gene Therapy for Pancreatic Carcinoma 480
Dan F. Via, MM, J. Michael DiMaio, MD, Salvatore Mungal, MS, Keith R. Berend, BS, Theodore N. Pappas, MD, and H. Kim Lyerly, MD

Corticosterone and Prostaglandin E Inhibit Perioperative Natural Killer Cell Cytotoxicity 482
Cathal J. Kelly, BSc, FRCSI, Albert Cheung, MD, and John M. Daly, MD, FACS

Inhibition of Human Kupffer Cell Cytotoxicity by Autologous Human Hepatocytes 484
Barry W. Feig, MD, Mark S. Roh, MD, FACS, Caroline Oyedeji, MS, Michael P. Kahky, MD, and Jim Klostergaard, PhD

Metabolic Phenotyping in Squamous Carcinoma of the Larynx: Evidence for the Role of Polycyclic Aromatic Hydrocarbons in Carcinogenesis 487
Scott J. Stern, MD, Masakuni Degawa, PhD, Martha V. Martin, BS, F. Peter Guengerich, PhD, R. Keith Kaderlik, PhD, and Fred F. Kadlubar, PhD

Survival and Toxicity of Xenogeneic Murine Retroviral Vector Producer Cells After Injection into Livers of Fisher 344 Rats 489
Donald W. Moorman, MD, Daniel A. Butler, MD, J. Daniel Stanley, MD, Mark R. Ackermann, DVM, PhD, Carol D. Jacobson, DVM, PhD, and Kenneth W. Culver, MD

The Sensitivity of Ovarian Epithelial Tumor Cells to Cytotoxic T Cells Is Associated with the Expression of HER2/neu 492
Ichiro Yoshino, MD, PhD, Deric D. Schoof, PhD, George E. Peoples, MD, and Timothy J. Eberlein, MD, FACS

Refined Localization of the Multiple Endocrine Neoplasia Type 2 Gene Locus to Within the Distal 10q11.2 Region 495
Ruth A. Decker, MD, and Francis S. Collins, MD, PhD

Staphylococcal Enterotoxin-B Combined with Bifunctional Antibody Effectively Neutralize Murine Melanoma Pulmonary Metastases 499
Christophe Penna, MD, Phillip A. Dean, MD, and Heidi Nelson, MD

Chromosomal Regions Implicated in the Development of Breast Cancer 502
Diane M. Radford, MD, FRCSEd, Keri L. Fair, BA, Alastair M. Thompson, MD, FRCSEd, Jon H. Ritter, MD, Matthew Holt, Samuel A. Wells, Jr, MD, FACS, and Helen R. Donis-Keller, PhD

Pentoxifylline as a Radiosensitizer: Evaluation of Mechanism 504
Maurice R. Mawad, MD, Susan A. Farr, MA, Padma I. Raju, MD, Lalita R. Hueneburg, BS, Salvatore P. Sutera, PhD, and Frank E. Johnson, MD, FACS

RAS-GAP Activation in Colon Carcinoma 507
Philip B. Paty, MD, Donald Wojciechowicz, PhD, Raouf Sayegh, MD, Sydney D. Finkelstein, MD, and Neal Rosen, MD, PhD

Cancer Serum Depletes Hepatocyte ATP, Suppresses Gluconeogenesis, and Causes Cell Death 510
David Blumberg, MD, Akira Tsuburaya, MD, Murray F. Brennan, MD, and Michael Burt, MD, PhD

Interleukin-2 Producing Fibroblast Cell Line Abrogates Tumorigenicity in a Murine Tumor Model: An Approach to Genetically Engineered Tumor Vaccines 512
Alexander R. Miller, MD, William H. McBride, PhD, ScD, Robert C. Moen, MD, PhD, Beatrice L. Schuck, MS, John A. Glaspy, MD, and James S. Economou, MD, PhD, FACS

HLA-A2.1 as a Restricting Antigen That Presents a Common T Cell-Defined Melanoma TAA to Melanoma-Specific CTL 514
Weiping Li, MD, Timothy L. Darrow, PhD, Zeinab A. Abdel-Wahab, PhD, and Hillard F. Seigler, MD, FACS

Recombinant Interleukin-12 (r-mIL-12) Mediates Regression of Both Subcutaneous and Metastatic Murine Tumors 518
Chet L. Nastala, MD, Howard D. Edington, MD, Walter J. Storkus, PhD, and Michael T. Lotze, MD, FACS

Murine Sarcoma-Specific Tumor-Infiltrating Lymphocyte (TIL) Clone Utilizing a Unique T Cell Receptor Rearrangement Successfully Treats Established Lung Metastases 521
Joel Shilyansky, MD, Michael I. Nishimura, PhD, James C. Yang, MD, Mary C. Custer, BS, James J. Mulé, PhD, and Steven A. Rosenberg, PhD, MD

Chapter X—Gynecology/Obstetrics

Placental Vessel Catheterization: A New Technique of Chronic Intravenous Access in Fetal Sheep 524
Henry E. Rice, MD, Marc H. Hedrick, MD, John F. Bealer, MD, Esmail D. Zanjani, PhD, Michael R. Harrison, MD, FACS, and Alan W. Flake, MD

Venous Access in Gynecologic Oncology Patients: A Comparative Study of Two Devices 526
James V. Fiorica, MD, FACS, FACOG, Noreen Gleeson, MD, William S. Roberts, MD, FACS, FACOG, Mitchel S. Hoffman, MD, FACS, FACOG, Desmond P.J. Barton, MD, and Denis Cavanagh, MD, FACS, FACOG

T Cell Receptor Vβ2 and Vβ6 Mediate Anti-Tumor Activity in Ovarian Tumor-Infiltrating Lymphocytes 529
George E. Peoples, MD, Michael P. Davey, MD, Deric D. Schoof, PhD, and Timothy J. Eberlein, MD, FACS

Umbilical Vein Contractility Is Enhanced by Increased Oxygen Tensions While Vasodilatory Responses Improve with Hypoxia 532
Kevin P. McMullen, BA, John F. Seccombe, MD, Matthew S.T. Chow, MD, Roger W. Harms, MD, and Hartzell V. Schaff, MD, FACS

Effect of Transplant to Conception Interval on Outcomes in Pregnancies from 266 Female Renal Transplant Recipients 535
Karl M. Ahlswede, MD, Beth Anne Ahlswede, BS, Bruce E. Jarrell, MD, FACS, Michael J. Moritz, MD, FACS, and Vincent T. Armenti, MD, PhD

Fibrocystic Disease and Endometriosis: A New Syndrome 538
Adrian L. Paredes, MD, FACS, Felipe Repper, MD, Rodriguez Santiago, MD, and Rene U. Bailon, MD

Preterm Labor in the Primate Responds to Exogenous Nitric Oxide 540
Thomas E. MacGillivray, MD, Russell W. Jennings, MD, and Michael R. Harrison, MD, FACS

Recurrent Endometriosis in an Infertile Population After Different Laparoscopic Treatments: Incidence and Predictors 542
Siu T. Ng, MD, and Mark Surrey, MD

Pregnancy Outcome in Women Undergoing Oocyte Donation with Leiomyomata Uteri or Prior Myomectomy 544
Beth A. Ary, MD, FACOG, Richard J. Paulson, MD, FACOG, and Mark V. Sauer, MD, FACOG

Human Trophoblasts Produce Inflammatory Cytokines 547
Michael E. Cunningham, MD, Marvin A. McMillen, MD, FACS, Larry H. Bernstein, MD, Erika L. Meaddough, BA, Ray E. Claus, MS, and Harvey J. Kliman, MD, PhD

Chapter XI—Neurologic Surgery

Cerebral Trauma-Induced Changes in Corpus Striatal Dopamine Receptor Subtypes 550
Jacquelyn M. Henry, PhD, Niranjan K. Talukder, Dr-Ing, Arthur B. Lee, Jr, MD, and Mark L. Walker, MD, FACS

Synergistic Effect of Basic Fibroblast Growth Factor and Methylprednisolone on Neurological Function After Experimental Acute Spinal Cord Injury 552
Richard Baffour, PhD, Patricia Brown, BSc, Jeffrey Kaufman, MD, FACS, Joel Berman, MD, FACS, Jane L. Garb, MS, David S. Knierim, MD, Sang Rhee, MD, FACS, and Paul Friedmann, MD, FACS

Delivery of Nerve Growth Factor with Polymer Microspheres Improves Functional Outcome in Hemiparkinsonian Rats Transplanted with Adrenal Medullary Cells 555
Paul J. Camarata, MD, Alejandro Mendez, MD, and Timothy J. Ebner, MD, PhD

In Vitro Analysis of Phospholipase A_2 Activity in a Glioma-Astrocyte Model 557
Paul A. Grabb, MD, and Mark R. Gilbert, MD

Morphological and Ultrastructural Analysis of C6 Glioma In Vitro 560
Jeffrey S. Gerdes, MD, Timothy C. Ryken, MD, and Vincent C. Traynelis, MD

Investigation of Lipid Metabolism in Normal Glia Using a Fluorescent Ceramide Probe 562
Timothy C. Ryken, MD, Vincent C. Traynelis, MD, and Alexander Sandra, PhD

Ultraprofound Hypothermia Combined with Blood Substitution: A New Protocol for Extending the Safe Limits of Cardiac Arrest for Up to Three Hours 564
Julian E. Bailes, MD, Amr M. Elrifai, MD, Michael J. Taylor, PhD, Shou-Ren Shih, MD, Edward Teeple, MD, Marc L. Leavitt, PhD, John G. Baust, PhD, and Joseph C. Maroon, MD

Cerebral Endothelial Cell Dysfunction After Brain Injury and Shock 568
Joseph D. Schmoker, MD, Marie A. Shatos, PhD, Steven R. Shackford, MD, FACS, and Jing Zhuang, MD

Pathologic Findings in Human Cerebral Arteriovenous Malformations (AVM) Embolized with Dacron-Coated Platinum Coils 570
A. Ahuja, MD, J.M. Miles, MD, V.B. Graves, MD, and C.M. Strother, MD

Bovine Fibrin Sealant: The Intraperitoneal Life Span of a New Hemostatic Agent 572
Suad Ismail, MD, William P. Glasheen, PhD, Steven L. Gonias, MD, PhD, John A. Jane, MD, PhD, FACS, and William D. Spotnitz, MD, FACS

Chapter XII—Orthopaedic Surgery

A Prospective Comparison of the Effect of Three Methods of Shoulder Arthroscopy Traction on Tissue Perfusion Measured by Pulse Oximetry 575
William L. Hennrikus, MD, Michael W. Bratton, MD, and John M. Lapoint, MD

Sarcolemmal Disruption and Fiber Damage in Muscle Strain Injury 577
C. Michael LeCroy, MD, Michael K. Reedy, MD, Anthony V. Seaber, and William E. Garrett, MD, PhD

Perfusion with University of Wisconsin (UW) Solution Improves the Survival of Secondary Ischemia Skin Flaps 579
Daniel Becker, MD, Michael F. Angel, MD, Kenneth R. Knight, PhD, L.R. Amiss, RN, and Raymond F. Morgan, MD, FACS

Leupeptin Protects Skeletal Muscle in Ischemia-Reperfusion Injury 581
Paul D. Angelchik, MD, Lester R. Amiss, RN, and Raymond F. Morgan, MD, FACS

Correlation Between Sciatic Function Index and Muscle Contractile Function Following Sciatic Nerve Regeneration in the Rat 584
William M. Kuzon, Jr, MD, PhD, FRCSC, Kevin C. Chung, MD, and Edwin G. Wilkins, MD

Isolation and Differentiation of Mesenchymal Stem Cells from Rabbit Muscle 587
Donald W. Pate, MD, Sheila S. Southerland, BS, Daniel A. Grande, PhD, Henry E. Young, PhD, and Paul A. Lucas, PhD

An Initial Investigation of the Growth Factors Involved in Canine Flexor Tendon Healing 590
Frederick J. Duffy, Jr, MD, John G. Seiler, MD, Richard H. Gelberman, MD, and Charles A. Hergrueter, MD

The Extracellular Matrix as a Modulator of Growth Factor Multifunctionality 592
Sean P. Scully, MD, PhD, and Wen-Ning Qi, MD

The Development of a Biodegradable Antibiotic Implant To Treat Orthopedic Infections 595
Jason H. Calhoun, MD, David R. Brantley, Brett Zimmerman, BS, Charles C. Gnam III, BS, Jody Marr, and Jon T. Mader, MD

Functional and Morphological Results of Canine Vascularized Total Knee Transplantation Under Cyclosporin A as Compared to Autologous Vascularized Knee Replantation 597
Dirk Schäfer, MD, Raphael Rosso, MD, Renato Fricker, MD, Reinhard Schläpfer, MD, Jürg Brennwald, MD, Gernot Jundt, MD, Pietro Regazzoni, MD, Felix Harder, MD, FACS, and Michael Heberer, MD

Caveat Arthroscopy 602
Herbert S. Schwartz, MD, and Thomas J. Limbird, MD

Chapter XIII—Otorhinolaryngology

Transforming Growth Factor-β and Platelet-Derived Growth Factor in Subglottic Stenosis 603
Paul A. Reder, MS, MD, Thomas V. McCaffrey, MD, PhD, and Mark R. Pittelkow, MD

Reconstruction of Circumferential Tracheal Defects Using Preserved Homologous Tracheal Cartilage 604
Joost L. Knops, MD, and Thomas V. McCaffrey, MD, PhD

Effects of a Lazaroid U74389F on Skin Flap Tolerance to Secondary Ischemia 606
Myoung-Soo Shin, MD, Michael F. Angel, MD, Michael J. Im, PhD, Craig A. Vander Kolk, MD, FACS, and Paul N. Manson, MD, FACS

The Salutary Effect of Electrical Stimulation on Neovascularization in Skin Flaps 608
Michael F. Angel, MD, David Y. Kang, Myoung-Soo Shin, MD, Michael J. Im, PhD, Craig A. Vander Kolk, MD, FACS, and Paul N. Manson, MD, FACS

Nitric Oxide (NO) Mediation in Superoxide-Induced Skin Flap Necrosis 610
Prakash Mullick, MD, PhD, Sai S. Ramasastry, MD, Nick Cecchino, BS, Robert E. Basford, PhD, and J. William Futrell, MD, FACS

The Effects of Exogenous Topical Prostaglandin-D_2 on Skin Flap Survival in Rats 612
Sai S. Ramasastry, MD, Krishna Narayanan, MD, Prakash Mullick, MD, PhD, J. William Futrell, MD, FACS, and Larry Weinstein, MD

"JB-RJK": A New Cell Line for the Study of Malignant Cellular Blue Nevus 615
R. James Koch, MD, MS, John M. Loré, Jr, MD, FACS, and George T. Simpson II, MD, MPH, FACS

The Role of Squamous Cell Carcinoma Antigen, Ferritin, and Carcinoembryonic Antigen as Serum Markers for Head and Neck Tumors 618
Frank A. Papay, MD, Ehab Hanna, MD, Manjula Gupta, MD, Pierre Lavertu, MD, Benjamin Wood, MD, and Ming Tan, PhD

Chapter XIV—Pediatric Surgery

The Effect of Nitric Oxide on the Colonic Smooth Muscle of Patients with Hirschsprung's Disease 620
John F. Bealer, MD, Eileen S. Natuzzi, MD, and Michael R. Harrison, MD, FACS

Regression of IMR-32 Human Neuroblastoma Xenografts After Local Newcastle Disease Virus Treatment 623
Kirk W. Reichard, MS, MD, Burt B. Katubig, MD, Robert M. Lorence, MD, PhD, Anan Phuangsab, PhD, Robert J. Walter, PhD, Mark E. Peeples, PhD, and Hernan M. Reyes, MD, FACS

The Role of Transforming Growth Factor-Beta in Human Fetal Wound Healing 625
Kerry M. Sullivan, MD, H. Peter Lorenz, MD, and N. Scott Adzick, MD, FACS

Colonization of Intestinal Bacteria in the Normal Neonate: Comparison Between Mouth and Rectal Swabs and Small and Large Bowel Specimens 627
Joan M. Van Camp, MD, Robert Drongowski, MS, Robert Gorman, Maher Altabba, MD, and Arnold G. Coran, MD, FACS

Secretory IGA Reduces Bacterial Passage Across Injured Intestinal Mucosa 630
Patrick J. Healey, MD, Leonard L. Go, MD, Simon C. Watkins, PhD, Richard L. Simmons, MD, FACS, and Marc I. Rowe, MD, FACS

Bacterial Translocation in Mesenteric Ischemia/Reperfusion Injury: Pathophysiologic Significance in an Infant Piglet Model 632
Andre Hebra, MD, Jeong Hong, MD, Karin L. McGowan, PhD, Melissa L. McKernan, BS, Carey Smith, BS, A. Alfred Chahine, MD, Eduardo Ruchelli, MD, and Arthur J. Ross III, MD, FACS

Kuppfer Cell Inhibition with Gadolinium Abrogates the Beneficial Effect of Intraportal Vein Donor-Specific Transfusion Given 24 Hours Before Small Bowel Transplantation 635
Tsuyoshi Takara, MD, Jean I. Tchervenkov, MD, FRCSC, Frank M. Guttman, MD, FACS, and Annie Fecteau, MD, MSc

The Effect of Cholecystokinin-Octapeptide on Hepatobiliary Function When Given During Total Parenteral Nutrition 638
Thomas J. Curran, MD, Ikechukwu Uzoaru, MD, John B. Das, MB, PhD, FRCS, Ghaus Ansari, MS, and John G. Raffensperger, MD, FACS

The Determination of Amino Acid Synthesis in Human Neonates Using a Glucose-Stable Isotope Tracer 642
Tom Jaksic, MD, PhD, FRCSC, Farook Jahoor, PhD, Peter J. Reeds, PhD, and William C. Heird, MD

Plug the Lung Until It Grows (Plug): A New Method To Treat Congenital Diaphragmatic Hernia In Utero 644
Marc H. Hedrick, MD, James M. Estes, MD, Kerry M. Sullivan, MD, John F. Bealer, MD, Alan W. Flake, MD, N. Scott Adzick, MD, FACS, and Michael R. Harrison, MD, FACS

Partial Liquid Ventilation Improves Gas Exchange in the Setting of Respiratory Failure During Extracorporeal Life Support (ECLS) 646
Ronald B. Hirschl, MD, Richard Tooley, MD, Alan Parent, BS, Kent Johnson, MD, and Robert H. Bartlett, MD, FACS

Lung Injury Does Not Increase Vascular Resistance if Pulmonary Arterial Blood Is Fully Saturated 649
Eric L. Lazar, MD, Samuel Weinstein, MD, and Charles J.H. Stolar, MD

Chapter XV—Plastic Surgery/Wound Healing

Use of Omental and Rectus Abdominis Flaps in Rat Models of Short Bowel Syndrome 652
Prosper Benhaim, MD, Lydia Masako Ferreira, MD, and Stephen J. Mathes, MD, FACS

Augmentation of Intestinal Absorptive Function Utilizing Pedicled Omental Flaps 655
Richard P. Rand, MD, and M.J. Jurkiewicz, MD, FACS

The Anatomic Basis for Serratus Anterior Aortic Counterpulsation in Humans 657
Anne-Elise Tobin, John H. Barker, MD, PhD, A. David Slater, MD, FACS, Laman A. Gray, MD, and Gordon R. Tobin, MD, FACS

Nitric Oxide Mediates Endothelial Permeability in the Rat Lung Following Oxidant Stress 660
Jennifer S. Engle, MD, Riley S. Rees, MD, FACS, Michael J. Welsh, PhD, Belinda S. Adamson, MS, Tiedong Li, MM, and Steve Kasten, MD

Autologous Fascia for Abdominal Reconstruction in Rabbits 663
Joseph J. Disa, MD, Marc H. Klein, MD, and Nelson H. Goldberg, MD, FACS

Chitosan Reduces Intraabdominal Adhesions to Polypropylene Mesh 665
Ronald R. Robertson, MD, Steve R. Holzman, MD, Joseph C. Jensen, MD, Donna D. Johnson, MD, Louis M. Fink, MD, Raymond C. Read, MD, and V. Suzanne Klimberg, MD

Skin Flap Tolerance to Secondary Ischemia in Diabetic Rats 667
Srdan Babovic, MD, Myoung-Soo Shin, MD, Michael F. Angel, MD, Michael J. Im, PhD, Craig A. Vander Kolk, MD, FACS, and Paul N. Manson, MD, FACS

Platelet-Activating Factor in Musculocutaneous Flap Reperfusion Injury..... 669
Mitchell A. Stotland, MD, and Carolyn L. Kerrigan, MD, MSc, FRCSC

Comparison of Neutrophil Function in Irradiated Skin and Muscle Flaps 674
Christian J. Gabka, MD, Prosper Benhaim, MD, Karen Fu, MD, Albert Chan, RRT, and Stephen J. Mathes, MD, FACS

The Induction of Autoantibodies to Thyroglobulin in Rats with Silicone Gel as Adjuvant 676
John O. Naim, PhD, Carel J. van Oss, PhD, and Raymond J. Lanzafame, MD, FACS

Fabrication of Nasal Implants Using Human Shape-Specific Polymer Scaffolds Seeded with Chondrocytes 678
Wolfgang C. Puelacher, MD, DMD, Joseph P. Vacanti, MD, FACS, Seob W. Kim, MD, PhD, John Upton, MD, and Charles A. Vacanti, MD

The Immunology of Silicone in a Murine Model 681
Robert K. Sigal, MD, Hassan Naama, FRCS, Howard Altman, MD, R. Barrett Noone, MD, and John M. Daly, MD, FACS

Analysis of Tissue Inhibitor of Metalloproteinase Levels in Human Wound Fluid 684
Eric W. Howard, PhD, Michael T. Longaker, MD, Elizabeth C. Bullen, BS, Louis L. Strock, MD, Martin C. Robson, MD, FACS, and Michael J. Banda, PhD

Vitamin A Reduces Plasma Corticosterone Levels: A Putative Explanation for the Beneficial Effects of Vitamin A on Steroid-Impaired Wound Healing 686
Anders E. Ulland, MD, Madeline H. Gartner, MD, and Michael D. Caldwell, MD, PhD, FACS

Prevention of Glucocorticoid-Induced Impaired Wound Healing by a Single Local Instillation of Nonviable *Staphylococcus Aureus* or Its Peptidoglycan 690
Tsueng H. Chang, PhD, Alvin Watford, Larry Freundlich, MS, Mayank Patel, MD, J.J. Steinberg, MD, and Stanley M. Levenson, MD, FACS

Long-Term Stability and Usefulness of Tissue Generated by Growth Factors 693
E. Gene Deune, MD, Sung-Pyo Hong, MD, PhD, John E. Tarpley, Suk-Zu Song, PhD, Cuneyt M. Sedar, PhD, Glenn F. Pierce, PhD, MD, and Roger K. Khouri, MD, FACS

Concentration and Profiles of Secretion of Naturally Occurring Growth Factors in Wound Fluid During Healing of Porcine Partial Thickness Wounds 697
Giselle Helo, MD, Peter Vogt, MD, Jose Marchena, Norvin Perez, Curtis Page, Christoph Andree, MD, Dimitrios Hatzis, MD, PhD, and Elof Eriksson, MD, PhD, FACS

Immunohistochemical Localization of TGF-β_1, -β_2, and -β_3 in Wound Repair 700
Rafael C. Cabrera, MD, Jon Canete, BS, John W. Siebert, MD, Michael T. Longaker, MD, H. Peter Lorenz, MD, and Leslie I. Gold, PhD

KGF Accelerates Ischemic Dermal Ulcer Healing in the Rabbit Ear 704
Liancun Wu, MD, Glenn F. Pierce, MD, PhD, Daniel A. Ladin, MD, Lily L. Zhao, MD, and Thomas A. Mustoe, MD, FACS

The Role of Nitric Oxide in Wound Collagen Deposition 706
Stephen J. Kirk, MB, FRCSI, Mark C. Regan, MB, FRCSI, Richard M.J. Palmer, PhD, Salvador Moncada, PhD, Hannah L. Wasserkrug, BA, and Adrian Barbul, MD, FACS

Calcium Channel Blockers Depolymerize Fibroblast Actin To Induce Collagenase Synthesis 709
Howard Doong, MS, Adam Myerov, BS, and Raphael C. Lee, MD, ScD, FACS

Effect of Schwann Cells in the Microenvironment of Regenerating Nerves 712
David J. Bryan, MD, FACS, Karl J. Hekemian, MD, Kai-Kai Wang, MD, Dimitria Chakalis, ORT, and Brooke R. Seckel, MD

Hypertrophic Scar Fibroblasts Accelerate Wound Contraction 714
Warren Garner, MD, Toni Rittenberg, MD, Paul Ehrlich, PhD, Soverin Karmiol, PhD, Jorge Rodriguez, MD, Sem Phan, PhD, MD, and David Smith, Jr, MD

The Effects of Transforming Growth Factor-Beta on Keloid Fibroblast Proliferation and Collagen Synthesis 717
David A. Bettinger, MD, Dorne R. Yager, PhD, Robert F. Diegelmann, PhD, and I. Kelman Cohen, MD

Fetal and Adult Sheep Fibroblast TGF-β_1 Gene Expression In Vitro: Effects of Hypoxia and Gestational Age 720
James Chang, BAS, Michael T. Longaker, MD, H. Peter Lorenz, MD, Anita B. Roberts, PhD, Michael R. Harrison, MD, FACS, N. Scott Adzick, MD, and Michael J. Banda, PhD

Transforming Growth Factors β_1 and β_2 Synergistically Increase Gene Expression of Collagen Types I and III in Fetal but Not Adult Fibroblasts 723
H. Peter Lorenz, MD, James Chang, MD, Michael T. Longaker, MD, and Michael J. Banda, PhD

An Experimental Model of Fetal Nerve Healing and Regeneration 726
Kant Y.K. Lin, MD, Jeffrey C. Posnick, DMD, MD, Mohammed A. Al-Qattan, MD, Juri Vajsar, MD, and Laurence Becker, MD

The Differential Effects of Platelet-Derived Growth Factor (PDGF) Isoforms on Fetal Wound Healing 728
Lisa J. Gould, MD, PhD, Robert F. Diegelmann, PhD, Dorne Yager, PhD, Wolfgang Meyer-Ingold, PhD, Andreas Albrod, MD, and I.K. Cohen, MD, FACS

Retinoic Acid Receptor Expression During Fetal Mouse Limb Morphogenesis 730
Marc R. Lussier, MD, MS, Anthony C. Sank, MD, Charles F. Shuler, DMD, PhD, and Debra L. Stafford, MD

Hyaluronate Receptor Expression in Fetal Fibroblasts 733
Samuel M. Alaish, MD, Dorne Yager, PhD, Robert F. Diegelmann, PhD, and I. Kelman Cohen, MD, FACS

Fetal Wound Healing—Regulation of Proteinase Activity by Factors in Amniotic Fluid 735
XiaoXing Gao, PhD, and Kenna S. Given, MD, FACS

Thermal Response of the Epidermis to Surface Gels 738
Lloyd M. Krieger, BA, Fushih Pan, MD, PhD, Howard Doong, MS, and Raphael C. Lee, MD, ScD, FACS

Characterization of Fibrous Dysplasia in a Nude Mouse Model: Evidence for Estrogen-Dependent Growth 741
Clifford P. Clark III, MD, and P. Craig Hobar, MD, FACS

A Guinea Pig Model for Pigmentation Study 743
Yu-Chuan Pan, MD, and Melvin Spira, MD

Chapter XVI—Urology/Reproductive Biology

The Characterization of Prostatic Cell Lines Derived from an INT-2 Transgenic Mouse and from a Normal Mouse: An In Vitro Model of INT-2-Regulated Prostatic Cell Growth 745
Tomotaka Hattori, MD, Michael L. Lu, PhD, Ian C. Summerhayes, PhD, Peter Clark, BA, Philip Leder, MD, and Jerome P. Richie, MD, FACS

Differential Expression of a Tissue-Specific 95-kDa Protein in Normal and Cryptorchid Rat Testis 748
Sidney C. Rubenstein, MD, W. Michael Schopperle, BS, William C. DeWolf, MD, FACS, and Abraham Morgentaler, MD, FACS

Anoxia and Corporal Smooth Muscle Dysfunction 750
Gregory A. Broderick, MD, David Gordon, MD, Lev Krasnopolsky, MD, Joseph Hypolite, and Robert Levin, PhD

Alloxan-Induced Diabetes in the Rabbit Does Not Impair Cavernosal Relaxation In Vitro or Penile Erection In Vivo 752
Jay H. Kim, MD, Mark G. Davies, MD, FRCSI, Young Chan Kim, MD, Per-Otto Hagen, PhD, and Culley C. Carson III, MD

Creation of a Cultured Urothelial Graft Using Biodegradable Mesh and Collagen Gel 755
Samuel Hakim, MD, David R. Chavez, MD, and Paul A. Merguerian, MD, FAAP

Neurotrophic Factors in the Diabetic Rat Penis 758
Alexis E. Te, MD, Harry P. Koo, MD, Steven A. Kaplan, MD, Ralph Buttyan, PhD, Carl A. Olsson, MD, FACS, and Ridwan Shabsigh, MD

Continent Intestinal Reservoir for Dialysis in Chronic Renal Failure 761
Saaed Akhter, MD, MPH, Paul Bunn, BS, Hana Illner, MD, G. Tom Shires, MD, FACS, Fred Buddingh, DVM, Jeffrey Jones, MD, and Darryl Powell, MD

Identification and Characterization of a High-Affinity Peripheral-Type Benzodiazepine Receptor in Rabbit Urinary Bladder Smooth Muscle 764
Eric J. Uhlman, MD, Michael R. Ruggieri, PhD, and Philip M. Hanno, MD, FACS

Granulocyte Elastase in Pyelonephritis 765
Manoj Monga, MD, and James A. Roberts, MD, FACS

Thrombin-Induced Expression of Neutrophil (PMN) CD18 Integrin: A Mechanism for Intrarenal PMN Sequestration 767
Puli Pramod Reddy, MD, Ronald P. Kaufman, Jr, MD, Brian K. McCandless, MD, Paul H. Neumann, BS, and Asrar B. Malik, PhD

HA-Ras Oncogene Induction of Invasion Is Associated with the Abrogation of Endonuclease Activity of Apoptosis 770
Michael Ostad, MD, Linda Kong, BA, Wei-Ping Shu, MS, Michael J. Droller, MD, FACS, and Brian C.-S. Liu, PhD

Allelic Deletions on Chromosome 11P Identify a Candidate Tumor Suppressor Gene in Testicular Malignancies 773
Robert C. Smith, MD, and Daniel B. Rukstalis, MD

Epidermal Growth Factor Inhibits Proliferation of the TSU-PR1 Prostate Cancer Cell Line 775
Barry F. Blitz, MD, Gerald W. Chodak, MD, FACS, and Daniel B. Rukstalis, MD

LAK Cell Killing of Human T24 Bladder Cancer Cells Occurs via Apoptosis—Possible Mechanism of Intravesical BCG Therapy ... 778
Menachem M. Shemtov, MD, David Li-Wei Cheng, MD, Wei-Ping Shu, MS, Michael J. Droller, MD, FACS, and Brian C.-S. Liu, PhD

Effects of Cytokine Gene Transfection on Human Renal Cell Carcinoma 781
Robert W. Hathorn, MD, Cho-Lea Tso, MS, Charles Sawyers, MD, Randhir Kaboo, MD, Jean deKernion, MD, and Arie Belldegrun, MD

$CD4^+$ TH2 Cells Dominate the Immune Response to Renal Cell Cancer 783
Peter S. Goedegebuure, PhD, Kyung-Yung Lee, MD, Yvedt L. Matory, MD, Valerie R. Andrews, MD, Jerome P. Richie, MD, FACS, Deric D. Schoof, PhD, and Timothy J. Eberlein, MD, FACS
